# RPET

**i** The fabric used in the manufacturing process of this product is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

# Objective: ZERO WASTE

The fabric used in the manufacturing process of these bags is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estas bolsas está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

# ANTI-BACTERIAL

Antibacterial material specially processed to inhibit and prevent bacterial growth, due to the incorporation of permanent static microbial agents, which are highly effective in the control against bacterial contamination.

Material antibacteriano, especialmente procesado para inhibir y prevenir las cargas bacterianas, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad contra la contaminación bacteriana.

# NATURAL JUTE

**i** Natural jute stands out among sustainable materials because the manufacturing processes have a low impact on the environment, together with its rapid regeneration. The natural aspect, together with its resistance and durability, makes it a sustainable material reference.

El yute natural ocupa un lugar destacado entre los materiales sostenibles, debido a que los procesos empleados para su fabricación suponen un bajo impacto para el medio ambiente, junto a su rápida regeneración. El aspecto natural, unido a su resistencia y durabilidad, lo convierten en un material sostenible de referencia.

# NATURAL JUTE

**i** Natural jute stands out among sustainable materials because the manufacturing processes have a low impact on the environment, together with its rapid regeneration. The natural aspect, together with its resistance and durability, makes of it a sustainable material reference.

El yute natural ocupa un lugar destacado entre los materiales sostenibles, debido a que los procesos empleados para su fabricación suponen un bajo impacto para el medio ambiente, junto a su rápida regeneración. El aspecto natural, unido a su resistencia y durabilidad, lo convierten en un material sostenible de referencia.

# RPET

**i** The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

# skill games

Did you know these games improve your skills and enhance brainwork? Learning to overcome challenges sharpens intelligence. Moreover, a positive correlation between these kind of games and the IQ levels of the people who play them regularly has been observed.

¿Sabias que estos juegos mejoran las habilidades de pensamiento y perfeccionan la capacidad de razonamiento?

Aprender a superar los desafíos agudiza la inteligencia, además se ha demostrado una relación positiva entre los juegos y los niveles de coeficiente intelectual de las personas que se entretienen con ellos de forma regular.

# RPET

**i** The fabric used in the manufacturing process of this item is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de este producto está fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

# RPET

**i** The fabric used in the manufacturing process of these products is made of recycled plastic (RPET). Like this, the emission of plastic residues to our planet and the consumption of energy is drastically reduced, resulting in a much more eco-friendly process.

El material de estos productos están fabricado con plástico reciclado (RPET), que, además de ayudar en la disminución de residuos plásticos en el planeta, utiliza menos energía en el proceso de fabricación, haciendo que sea mucho menos dañino para el medio ambiente.

# ANTIBACTERIAL LINE

## ¿Qué son los aditivos antibacterianos que se usan en los productos?

Una importante fuente de infecciones para el ser humano es la contaminación bacteriana. En determinadas condiciones ambientales, las bacterias son capaces de proliferar de manera exponencial formando grandes colonias y produciendo situaciones de insalubridad para el ser humano.

Para garantizar un ambiente higiénico es importante controlar la proliferación microbiana. Es por ello que en la actualidad son cada vez más demandados productos con tratamientos antibacterianos, dirigidos a los ambientes en los que la higiene es particularmente importante: en los entornos públicos como por ejemplo el transporte, en el ámbito de la educación, o para el uso personal como artículos de uso diario, son las áreas donde empiezan a tener una relevancia cada vez mayor.

Los productos con tratamientos antibacterianos son capaces de reducir drásticamente las cargas bacterianas presentes en las superficies de los materiales, gracias a la incorporación de agentes microbianos permanentes estáticos, con alta efectividad para inhibir y prevenir la contaminación bacteriana.

Los estándares ISO 22196 e ISO 20743 determinan la actividad antibacteriana en materiales plásticos y superficies no porosas y en productos textiles, respectivamente. Estos análisis permiten conocer la efectividad de inhibición microbiana que tienen los aditivos sobre los objetos tratados mediante una evaluación cuantitativa.
